To Whom It May Concern:

I am writing on behalf of Doug Evans and Sandi Chouinard, regarding their farm, Snowfield Alpacas. To begin, I believe it will be helpful to have some insight into alpacas as a species. Alpacas are the cleanest of all livestock species, utilizing a communal dung pile. This results in very clean pastures, with no odor. Additionally, they are very quiet animals, often living on small plots in backyards, unnoticed by neighbors.

I have been the veterinarian for Snowfield Alpacas for thirteen years. Sandi and Doug keep the barn, pastures and barnyard meticulously clean at all times. The animals have always been extremely well cared for, are kept very clean and are shorn annually. Additionally, Sandi and Doug have always followed my directions explicitly, and have been very easy to work with.

I can advise, with no reservations, that these alpacas would not be a disruptive influence in any community. If you have any further concerns, please do not hesitate to contact me.
