All New England states except NH/Vt have legislation pending to ban or regulate vape shops. Little is known about side effects but it is expected that similar hazards to smoking will result. Students have access to these pipes (if you will) and are using them with legal and illegal substances. It is much harder to detect an odor from an illegal substance. I would not like to see these in town from a student health perspective, nor as a resident. I don't feel that it fits with the town culture.

That said, this is a free enterprise society.

I have a note out to other NH colleges to see if they have vape shops nearby and if there is any known detriment to the campus.

Hello,

I just read up on information that in FL in the vapor rooms they are having major over doses as the people who are vaping are using other drugs while doing so and it is becoming a real problem for the police. I will attempt to find this article again. Also of a interesting note I found my first vapor store and it is in the Manchester mall. The store was very bare it had a few seats and I noted three customers who were vaping. Walking by the store I noted that it was very smelly with all the scents from the vapor that was coming from the people who were using the systems.

Just thought I would pass this along.

Eddie

Hello,

In terms of Law Enforcement issues I do not see any.

Thank You,
Eddie

Good morning Lucy,

I have no issues with the bookstore for the vaporizer lounge. I hope all is well and will talk to you soon.
