Subject: Public Hearing on Dorr Family Farm Site Plan

Bill,

Since I cannot be at the hearing, I have one important comment. White Brook, a "designated" stream which is a substantial part of Pleasant Lake's watershed, originates on the Dorr Family Farm lot 060-005-000. According to Article XXII there are limitations placed on activities around White Brook. A 100 foot set back is one of these. Since the Planning Board essentially vacated its responsibilities with regard to this in dealing with the Canane property, I would hope that they would this time move to impose the limitations expressed in this article. One comment for now and maybe next year's rewrite project and that is sighting Best Management Practices is close to ludicrous, since one can find a BMP which suits your argument. There are many of them out there.

John Wilson
