

New London Energy Committee
February 1, 2017 Agenda
Tracy Library Conference Room – 7:00 PM

1. Discussion of December and January **meeting minutes**
2. The priorities for this meeting will be a brief update on EV Charging stations and findings from the two exploratory meetings with ReVision Energy and Solaflect conducted in late December and early January.
3. Determine the next steps for the project and begin to develop a detailed action plan for moving forward with these initiatives.
4. Current priority projects are included in the table below. Other projects removed from this table for the sake of efficiency and clarity.

Decision	Project description	Project Team
1. Will pursue further to determine interest/feasibility	EV Charging stations: Should also consider installing one at the Chamber of Commerce location across from the library.	
2. Phase 1	Solar energy for town buildings (PV and H ₂ O), including the elementary school – Jamie will investigate how Norwich, VT arranged their solar energy investments. Hold for update from Jamie next month.	
3. Pursue if we do not do item 3 above.	Community solar farm (sewer lagoons, or old landfill area). Warner has such a system.	
4. Ongoing	Update NLEC webpage and maintain social media. Tim will send Dave H. and update.	
5. Phase 1	Viewing of a series of movies including Chasing Ice (shown in Andover) – would need someone to lead the discussion afterward. (Andover has started this initiative).	

5. Other business/future plans
6. **Next meeting:** March 1, 2017 at 7:00 in the Tracy Library Conference Room.
