Subject: Eversource plans for Soo-Nipi Park Road

To whom it may concern....my family has owned lakefront property in Soo-Nipi Park for generations...there is and has been an electric wire and poles through our property (302 Soo-Nipi Park) for years that extend all the way to what we have always referred to as Bemis Point...now owned by Robert Carr. Rather than cutting down dozens of trees and putting up poles and wires that crisscross the beautiful scenic road to the lake, why can't Eversource continue said existing line over to the proposed lots for sale? Less damage, less cost, and saves one of New London's last unspoiled country roads. I sincerely hope that the planning board will consider this idea seriously and take into consideration the neighborhood that has enjoyed it's special beauty coming home to their lake shore properties.
