**Re: Application for Variance  
Anne and David Wustrow/575 Forest Acres Road, New London**

Ladies and Gentlemen:

We are the owners of 506 Forest Acres Road, New London. We write this letter to support the application of Anne and David Wustrow for construction of a new home to replace the existing house now located on their property. We have reviewed their application, and think it will be a great improvement to the existing structure, which, as indicated in the application, is much in need of upgrade. The proposed new structure will be consistent with other newer structures on Messer Pond, and we see no detrimental effect that will result from granting the required variances. Anne and David have taken care to make sure there will be minimal impact to the waterfront buffer on their property, and that almost all existing vegetation will be undisturbed. We would expect no less from Anne and David, whose family, it is important to note, has enjoyed the pond for decades. They are wonderful neighbors and careful stewards of the health and beauty of the pond.

We urge the Board to approve their application, and look forward to seeing Anne and David and their family for years to come in their beautiful new home.

Very truly yours,

Richard and Nancy Cohn
